

Youth Xchange 2012 Sponsored Category:

Healthy Homes & Community Environments

*Calling All
Elementary, Intermediate, & High School Students!!*

Our environment can really affect our health. In our homes and around our communities, what things should we be concerned about, or what improvements can be made to keep us in good or better health?

What types of environmental pollution can make us sick, and how can we change that?

What are the messages that you would want to share?

Videos can be 3-5 minutes long.

Apply your creativity to any topic that applies to situations in Hawai'i, such as:

- Pesticides & Herbicides
- Hazardous Waste
- Indoor Air
- Safe Drinking Water
- Walkable Communities

For more ideas and information visit
