

Youth Xchange 2010 Sponsored Category:

Reduce Reuse Recycle

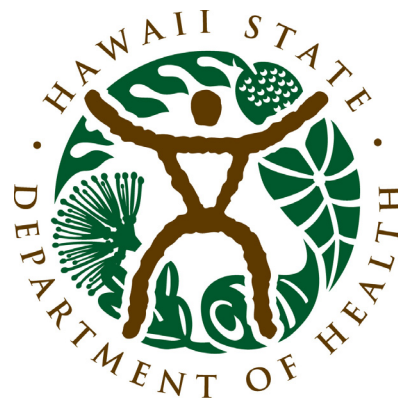

Go ahead, Hawai'i: Give yourself a HI-5!

What is the HI-5 Recycling Program?

Each year, approximately 900 million beverage containers are sold in Hawai'i. These containers are often discarded in the waste stream or as litter in our community. Consumers can help by recycling as many beverage containers as possible.

As an incentive, the HI-5 Recycling Program places a 5¢ redeemable deposit on each beverage container. Consumers get back 5¢ when they return containers to a redemption center.

Below are some ideas to get you started.

Use these ideas or come up with your own reasons to HI-5 recycle.

Enter a 30-second PSA and you might win a video camera for your school!

Why should you participate in the HI-5 Recycling Program and recycle beverage containers? Because...

- You can save resources and energy.
- You can reduce litter and trash in our 'āina and prolong the life of our landfills.
- You can raise money for schools or groups.
- You can reduce pollution and protect natural habitats.
- You can!

Find more information on the HI-5 Recycling Program at www.hi5deposit.com.

All entries must be submitted by **Monday, March 1, 2010**
